PORTFOLIO & PROJECTS

[Online portfolio](#)
[Live dashboard \(Streamlit\)](#)

TOOLS & TECHNOLOGIES

- SQL & PostgreSQL
- Python (Pandas, data analysis)
- Power BI
- Tableau
- Grafana
- Advanced Excel
- ReportServer
- ETL / Data Modeling
- Django REST Framework
- PHP / Symfony
- WSO2 API Manager
- Linux & Windows

CORE COMPETENCIES

- Data analysis & interpretation
- Dashboard & report design
- Analytical thinking & problem-solving
- Clear communication of technical findings
- Process and reporting automation
- Cross-disciplinary teamwork
- Time & priority management
- Continuous learning & adaptability

LANGUAGES

Spanish (Native)
Portuguese (Fluent)
English (Intermediate – B1)

Yenismara Pelayo García

Data Analyst | Business Intelligence Specialist

PROFESSIONAL PROFILE

Computer Science Engineer with more than 15 years of experience combining software development, data engineering and business analysis. Specialized in turning operational and financial data into actionable insight using SQL, Python and visualization tools such as Power BI, Tableau and Grafana. Solid experience designing and optimizing PostgreSQL databases, automating technical and financial reporting with ReportServer, and building real-time monitoring dashboards to support decision-making. Currently working as an independent data analyst, developing her own analytics and Business Intelligence projects.

PROFESSIONAL EXPERIENCE

Data Analyst — Independent / Freelance October 2024 – Present
Own projects, Angola / remote

- Developed an end-to-end e-commerce sales analytics project (Power BI + Python/Streamlit), including data modeling, an interactive dashboard and an analysis app published online.
- Ran performance diagnostics and optimization on Power BI dashboards, identifying rendering bottlenecks and proposing technical improvements.
- Built an online portfolio and case studies to showcase data analysis and Business Intelligence capabilities to potential clients.

Senior Backend Developer & Data Analyst June 2021 – September 2024
XETID – Defense Information Technology Company, Matanzas, Cuba

- Designed and optimized PostgreSQL databases and complex SQL queries for critical monitoring and information management systems, ensuring reliable, analysis-ready data.
- Built real-time Grafana dashboards to track key performance indicators (KPIs), enabling early detection of anomalies and data-driven decisions.
- Automated technical and financial reporting with ReportServer, reducing manual work and improving data reliability.
- Analyzed the performance of large-scale corporate platforms and developed REST APIs (Django REST Framework, Symfony) to integrate multiple data sources across systems, managing their lifecycle with WSO2 API Manager.
- Collaborated with cross-functional teams on requirements analysis and the continuous improvement of reporting and monitoring solutions.

Computer Science Specialist November 2014 – June 2020
Servindus, Matanzas, Cuba

- Administered servers (Linux/Windows) and implemented backup and recovery policies, ensuring data availability and integrity.
- Provided specialized technical support to end users and development teams.

Technical Support Specialist September 2010 – October 2014
TRD — Tiendas Recaudadoras de Divisa, Cuba

- Provided technical support and desktop software installation for the company's economic and commercial systems.
- Maintained PCs, printers and cash registers, supporting approximately 10 stores across the province.

RELEVANT PROJECTS

E-commerce Sales Intelligence — Power BI

An executive Power BI solution turning transactional e-commerce data into decisions: a six-page report covering sales, customers, products and operational risk, built on a star-schema data model with Power Query transformations, DAX measures and what-if scenario simulation to evaluate the impact of reducing cancellations.

<https://ypelayog25.github.io/portafolio/ecommerce-sales-intelligence.html>

E-commerce Sales Analysis Dashboard — Python (Streamlit)

Interactive Python/Streamlit application to explore sales performance, customer behavior and product trends, published online as a live demo — a companion analytics app to the Power BI project above.

<https://ecommerce-analysis-project-ypg.streamlit.app/>

Real-Time Economic Indicators Monitoring Platform

Technical leadership of the backend, integration of multiple data sources, and automation of strategic report generation to support executive decision-making.

Corporate Project Management System

Full backend and API development for the centralization and tracking of dozens of projects annually, with direct impact on operational efficiency and strategic management.

EDUCATION

Bachelor's Degree in Computer Science Engineering
Universidad de las Ciencias Informáticas (UCI), Havana, Cuba

- Final Thesis: Cost analysis proposal for the SCADA project using Rough Set Theory.
- Data Analytics Essentials — Cisco Networking Academy (2025)

PUBLICATIONS & RECOGNITION

Gutiérrez Pedroso, A.; Pelayo García, Y. — NEURAMA, *Electronic Journal of Psychogerontology (psychological functioning and quality of life, Huambo, Angola).*

Member of the Cuban Association of Engineers; participated in UNISOC 2022, CIUM 2023 and UNISOC 2024.
