CORE SKILLS

- Python
- PHP
- Django REST Framework
- Symfony
- WSO2 API Manager
- PostgreSQL
- Excel
- SQL
- Tableau
- Grafana
- ReportServer
- Linux
- Windows
- Software Architecture
- Systems Integration
- Systems Monitoring
- Data Analysis Process
- Analytical Thinking & Problem Solving
- Clear Communication of Technical Concepts
- Teamwork & Cross-Disciplinary Collaboration
- Time & Priority Management in Demanding Environments
- Continuous Learning & Fast Adaptation to New Technologies
- Autonomy, Proactivity & Professional Ethics

LANGUAGES

Spanish (Native)

Portuguese (Advanced)

English (Professional Working Proficiency)

PROFESSIONAL PROFILE

Computer Science Engineer with more than 14 years of experience developing robust, secure, and scalable backend solutions for mission-critical enterprise environments. Strong specialization in the design and implementation of high-performance REST APIs, complex systems integration, and continuous monitoring of technology platforms. Solid command of Python/Django REST Framework and PHP/Symfony, with extensive experience managing the API lifecycle with WSO2 API Manager, real-time data visualization with Grafana, and generating analytical and financial reports with ReportServer. Complementary training in Data Analytics from the Cisco Networking Academy, combining software development with analytical skills to support data-driven decision-making. Results-oriented profile with high technical rigor and strong adaptability to Angola's technological and business landscape.

EDUCATION

Bachelor's Degree in Computer Science Engineering

Universidad de las Ciencias Informáticas (UCI), Havana, Cuba

- Final Thesis: Cost analysis proposal for the SCADA project using Rough Set Theory.

PROFESSIONAL EXPERIENCE

Senior Backend Developer

XETID – Defense Information Technology Company, Matanzas, Cuba

- Developed, maintained, and optimized backend systems for large-scale corporate platforms, focusing on performance, security, and scalability.
- Designed and implemented REST APIs using Django REST Framework and Symfony, ensuring high availability and optimized response times.
- Designed, administered, and optimized PostgreSQL databases for critical monitoring and information management systems.
- Managed the full API lifecycle with WSO2 API Manager, ensuring versioning, security, and controlled consumption across multiple systems.
- Implemented monitoring dashboards in Grafana for proactive tracking of performance indicators and early failure detection.
- Developed automated technical and financial reports with ReportServer, increasing information reliability and reducing manual processes.
- Collaborated continuously with multidisciplinary teams on requirements analysis, solution design, and continuous system improvement.

Computer Science Specialist

Servindus, Matanzas, Cuba

- Administered and maintained servers in Linux and Windows environments.
- Implemented backup and data recovery policies, ensuring continuity of services.
- Provided specialized technical support to end users and development teams.
- Ensured the operation, security, and stability of the technology infrastructure.

COURSES

Data Analytics Essentials

Cisco Networking Academy

RELEVANT PROJECTS

Corporate Project Management System

Full backend and API development for the centralization and tracking of dozens of projects annually, with direct impact on operational efficiency and strategic management.

Real-Time Economic Indicators Monitoring Platform

Technical leadership of the backend, integration of multiple data sources, and automation of strategic report generation to support executive decision-making.

SCIENTIFIC PUBLICATIONS

Gutiérrez Pedroso, Ariel; Pelayo García, Yenismara. "Psychological Functioning for Improving Quality of Life: A Perspective from Huambo, Angola." NEURAMA – Electronic Journal of Psychogerontology.

ADDITIONAL INFORMATION

- Member of the Cuban Association of Engineers, with participation in international scientific events.
- Participated in UNISOC 2022, CIUM 2023, and UNISOC 2024.
- Proven experience in highly demanding technological environments, with a strong commitment to quality, innovation, and continuous improvement.
